Project Overview:

A Study in Guides by last_minute_panic

Our project is to create a website in an attempt to have a place to collect all Stuy-related study guides and create a marketplace for them. One can buy or sell the various study guides uploaded onto our site. In addition, there is a discussion room where academic discussions on various topics can occur.

Components

1. Accounts

- Every user must sign up for an account and log in to access everything on our site

2. The Market

- Where users can browse and redeem study guides uploaded by other users
- The subject, price, uploader, and ratings/reviews are visible to the user, as well as a preview of the study guides
- There is a search/filter function by subject/uploader/price/rating etc.

3. Home

- Where users view their own study guides, bought or uploaded
- Users can submit their own study guides and set prices for them on the market
- Users can rate study guides they have bought when they are viewed

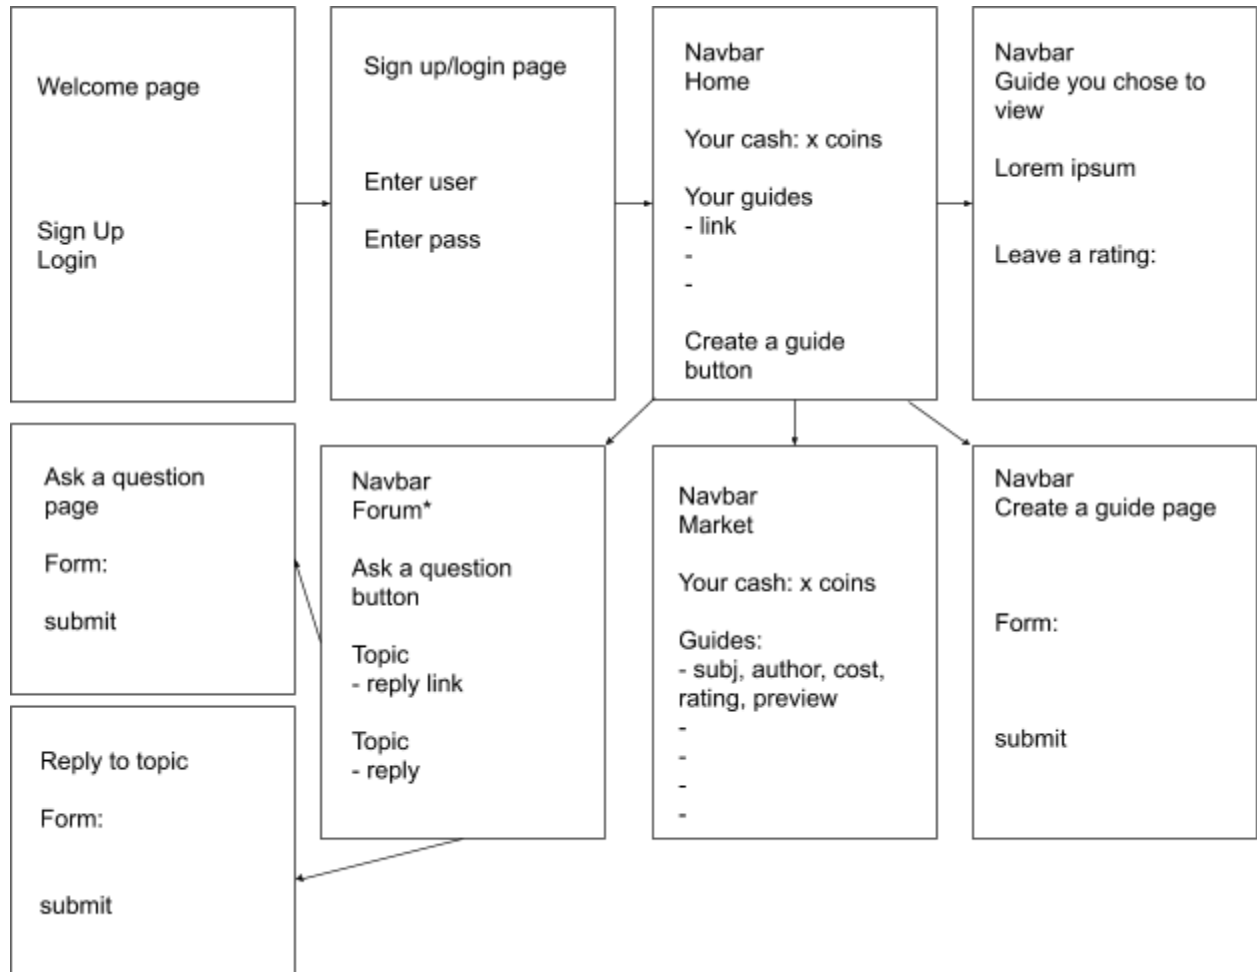

4. Currency

- There is a currency system in place to encourage users to share guides to earn coins to be able to redeem more study guides on the market

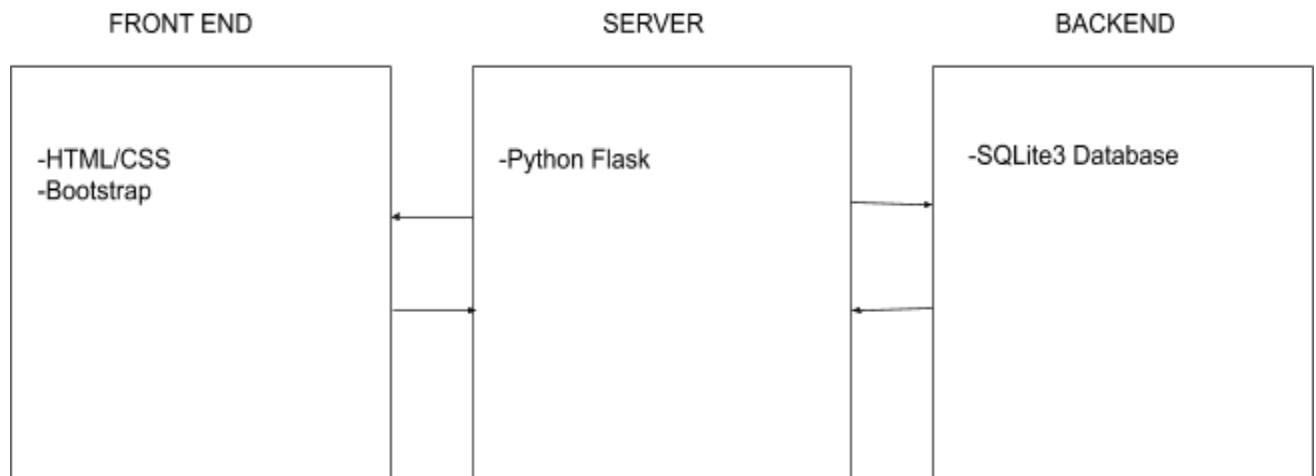

5. The Forum*

- Where users can interact with each other and have academic discussions
